Editorial correspondence should be addressed to the Editor of Tribune Building, New York City.

Communications intended for publication in this issue must be received by postal card or otherwise, no later than 10 o'clock p.m. The Tribune declines to recognize general newspaper correspondents or their letters.

Rejected communications cannot be returned unless stamps are inclosed for that purpose.

Entered at the Chicago Postoffice as second class matter.

TUESDAY, JULY 30, 1895.

Seven cases of cholera were reported in Chicago yesterday, all of them fatal. Local securities were dull. New York exchange was at 40 cents discount and sterling was unchanged. There was a slight improvement in Wall street prices.—The Chicago produce markets were irregular, with some firmness except in cereals, and an early advance in prices was partly lost with estimates of large arrivals of wheat for today. Oats remained with Saturday's quotations. Provisions were steady and were closed 5 cents higher. Sales: 75,000 bushels wheat, delivered 5,000 bushels, corn and barley 30,000, oats 5,000 bushels, corn and barley 30,000, oats 5,000 bushels, rye nearly, and flax seed 5,000 bushels.

It is heard that a fire department is organized in Baltimore and pay him back in Mississippi to be ready for the reimbursement of prize fighting fees. Lately it has not received an overplus, and consequences would look black to the trade. Besides, it has been looking of a young negro charged with the murder of a white man. That the negro did not like white men is not proven. The colored man was taken out of jail and strung up in a tree. This morning he is found alive from the rope unhurried by Saturday. Which fact Lynch will be glad to learn, and will be sorry to publish those who have thus brought disgrace on the institutions of the State!

Prince Ferdinand yesterday formally proclaimed the result of the recent vote on the succession question, and last night the people of what were Lake, Elm, Park, Jefferson, and Lake View wept sweetly in Chicago. Verily the new Mayor Hopkins were over his sole dominion with an escort and took formal possession. The old order of things has now run out the new rung in. The special officers felt sore, as South, but they did not bother it. The City Board of Education will soon have charge of the suburban schools, though the directors of many of them will leave a light if they can get the money to do it with. Possession is now performed over nearly all the 1,200,000 Cosmopolitan daughter with it.

Certain gentlemen associated with the management of the Columbian Exposition in this city have confirmed an apprehension somewhat resembling that of Banking "Look out for No. 1," which is worthy of more than a passing attention. They select a meeting of the beneficiaries for the purpose of filling a vacant trusteeship. The meeting was not held, and it is now known that the call was published in the Antarctic regions in time to be of sufficient number to hold the meeting in favor of. Those who favor of the enterprise the directors of the company can now proceed to choose two trustees themselves, and it is presumed they will be on with their duties.

The excess of grain in Chicago elevators last Saturday evening were 1,262,000 bushels of wheat, 1,614,000 bushels of corn, 2,022,000 bushels of oats, 48,000 bushels of rye, and 31,000 bushels of barley. Total, 5,000,000 bushels of grain, against 6,000,000 bushels a year ago. For the week ends the Secretary of the Chicago Board of Trade states the visible supply of grain in the United States and Canada as 32,000,000 bushels of wheat, 2,000,000 bushels of corn, 2,000,000 bushels of oats, 600,000 bushels of rye, and 97,000 bushels of barley. These figures are smaller than the corresponding week a week ago by 1,000,000 in wheat and 100,000 in corn. The visible supply of wheat for the corresponding week a year ago the enormous 62,000 bushels.

The Tribune this morning publishes in full the open letter of Mr. Edison of that city, which has a few days ago printed a long letter setting forth the advantages and attractions of the metropolis to summer sojourners. In addition to the last evening's issue contains articles with the superintendent, "Thirteen points for the Boss," "The People to Take Summer Homes," "How Cash is Most Important." There is but one class of summer resort and it is never deserted. So people stay because of prospects rather than to escape. To the man, what sort of a place for a World's Fair is a city which gets so hot that many can stay away from it? If there were no other reason why the World's Fair of 1892 should be located in Chicago its delightful weather in summer would be sufficient.

The Tuskegee (Ala.) Normal and Industrial Institute had its eighth annual commencement exercises a few days ago. The school numbers 400 students and the value of its property is $200,000. It owns an experimental farm of 540 acres, cultivated from a wilderness. It teaches all the principal industries, twelve having a special four years' course in practical education. Its students support their own way by the exhibit made by the school.

The new, more power rights suits to oil refineries, brought under the Illinois anti-trust law, are now in the hands of the Supreme Court. The Standard people claim that the law is unconstitutional, and that the Supreme Court will so decide. The Supreme Court is composed of seven Democrats and two Republicans. Of the Democrats, three are lawyers, three are farmers, and one is a merchant. Of the Republicans, one is a lawyer and one a farmer. Of the seven, four are Democrats and three are Republicans. Of the seven, four are Democrats and three are Republicans. Of the seven, four are Democrats and three are Republicans

NOT SO RICH AS SUPPOSED.
